

Share Yourself Artists : Style Guide

- All functions and variables must have intent-revealing names.
- All files must have internally consistent indentation.
- Function names cannot begin with capital letters.
- Vue components are organized as [template], [script], and then [style].
- All functions must use either camelcase or underscores if required.
- The end of JavaScript lines should not contain a semicolon.
- All functions must be commented to help express their intent.

➤ Object Creation:

```
// Bad
const item = new Object()
// Good
const item = {}
```

➤ Line Breaks:

```
// Bad
const arr = [
  [0, 1], [2, 3], [4, 5],
];
```

```
// Good
const objectInArray = [{
  id: 1,
}, {
  id: 2,
}];
```
