Sprint 1 Report: SYA Team 2 – Business Flow

Zion Calvo, Kaio Barbosa, Roslyn Axtell
10/22/18

Actions to stop doing:
- Waiting for Scott to tell us what to do. Be more proactive rather than reactive.
- Having one scrum board for all four sprints. This makes it difficult to see which user stories are for the current sprint.
- Stop making user stories independent of Scott

Actions to start doing:
- Send Scott meeting reminder emails. He has so many meetings to keep track of since he has so many different teams to juggle.
- Creating and following a sprint plan. We haven't been able to meet with Scott long enough to determine which user stories are most critical and decompose them into tasks.
- Meet at regular times. Meeting times have been irregular but are now on Mondays 4-5pm, Tuesdays 1:30-3:30pm, Thursdays 1-3pm.

Actions to keep doing:

It feels as though we lack direction, knowledge, and action for how to start our tasks. We need to improve our communication with Scott so he can help us get started. Among team members, however, there exists good communication about scheduling and a desire to get started.
- Keep up the good communication about scheduling and tasks and motivation to contribute

Work completed/not completed:

Not Completed:
User Story 1: As a blog, I want to see my submissions
User Story 2: As a blog, I want to see how many artists I have responded to.
User Story 3: As a blog, I want to show how many followers I have
User Story 4: As an artist, I want a step-by-step guide for utilizing the website so I can understand all the tools and features at my disposal.
Completed:
User Story 5: As a developer, I need to be able to write information to a database.

None of the above user stories were completed during the first sprint because we were instructed by Scott to finish our crud app first and did not have much direction/onboarding to start our tasks.

Work Completion Rate:

       Total # User Stories Completed: 1
       Total # Estimated Ideal Work-Hours Completed: 20
       Total # Days: 14
       User Stories/Day: 0.07
       Work Hours/Day: 1.43
